

COLD SPRING CREEK DEBRIS FLOW MITIGATION PROJECT UPDATE

INFORMATION MEETING

As the Cold Spring Creek Debris Flow Mitigation Project reaches substantial completion, the RDEK has planned a meeting for the community to provide more detailed updates on the project; what is left in the final stages of completion; and, the financial aspects of the project and budget. The session will be held via Zoom.

JANUARY 28, 2025 | 2:00PM
VIA ZOOM

To access meeting link: engage.rdek.bc.ca/debris

For anyone with prior commitments or unable to attend, the session will be recorded and posted on the project page. Those without computer access can contact the RDEK:

IMPORTANT SAFETY NOTICE

Although the project is nearing final completion – it is extremely important to remember the site remains an active construction area. The public needs to stay out of the area for their safety. The access roads are gated and blocked and we are in the process of putting up additional signage. Temporary fencing has been placed at each end of the barrier (permanent fencing will be completed once the concrete has fully cured). It is not safe to access the barrier and there are a number of hazards on the site itself that pose a danger.

Please respect the closure and stay out of the construction site.

PROJECT UPDATE

The crew worked extremely hard in late December to complete the final roller compacted concrete (RCC) in the structure. The structure has been covered in a protective insulation barrier to allow the concrete time to properly cure over the next few months. Final clean up and project completion is now anticipated in the spring of 2025. In the interim, while the crew will be off site and the construction lights will be turned off, it remains an active construction site.
