

What's the difference?

The world of Containers

CONTAINERS

Containers is a vast category that includes both plastic and metal containers as well as plastic coated containers (such as coffee cups and milk cartons). This bin accepts any rigid plastic packaging, tin and aluminum cans, foil pie plates and aluminum foil. Cartons for ice cream, milk and milk alternatives (soy, almond, rice, etc.) as well as hot or cold take out cups from cafés and fast food restaurants.

Please don't include motor oil, antifreeze or other hazardous materials containers in the Containers bin.

Plastic containers are recycled into new packaging, broadloom, rope, brush bristles, car bumpers, household

furnishings, decking, picnic tables, deck chairs and gardening supplies. Plastic coated paper packaging is recycled into new boxes, paper towels, tissues, paper-based plant pots, the paper cover for drywall liner, kraft paper, brown paper products including paper towels. Aluminum is recycled into new aluminum containers, road signs and window frames. Steel packaging is recycled into fencing, chicken wire and other industrial products.

As you can see, the Containers category accepts a whole lot of different products, the attendants at the Recycle BC Depots are there to answer any questions that may arise.

Recycle BC Depots in the region.
